

# Welcome to the new Midwest Cover Crops Council Website!

Check out our new features for a more user-friendly experience!

News and Updates

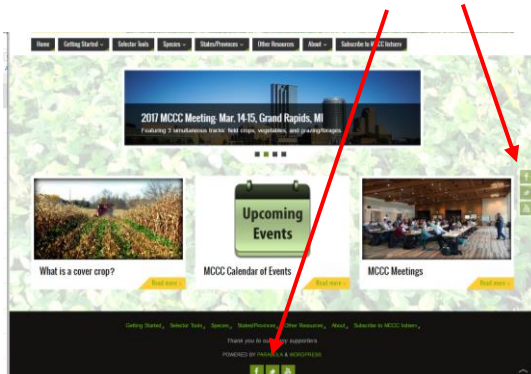

The scrolling banner at the top of the page will give the latest MCCC news.

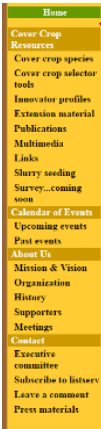

Social Media

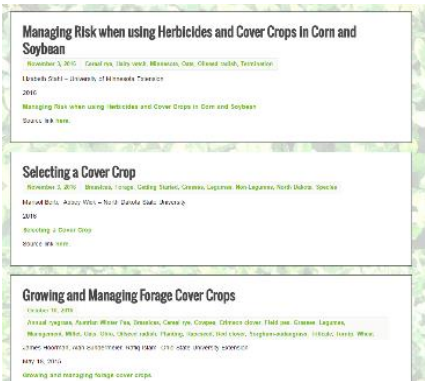

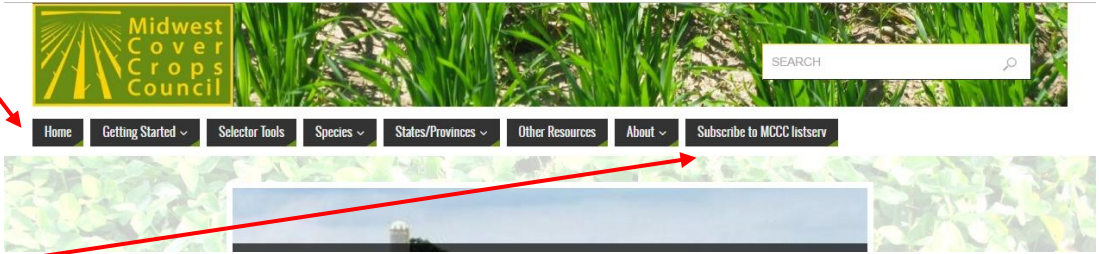

Search

Right side of every page and bottom of home page

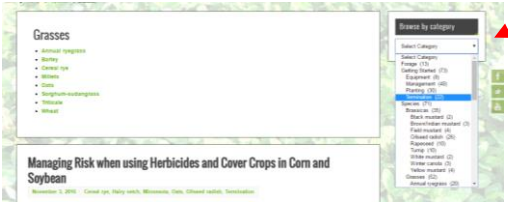

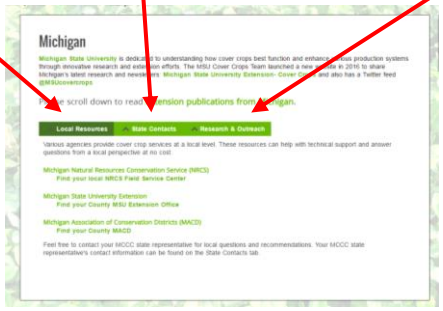

The left side bar menu has been changed to a horizontal menu at the top of the page. Here you can find selector tools, state and province pages, species pages, and more!

Publications and Extension materials are listed under each appropriate topic (such as species and state) as posts. They are organized chronologically, and searchable. You can also browse by category by choosing a topic that interests you here...

Each state and province page has three clickable tabs for information on "Local Resources", "State Contacts", and "Research and Outreach".

State Extension publications and materials are listed below.

### Mobile Responsive Layout

The new site will automatically adjust the layout based on your screen size. This makes our site mobile friendly for phones and tablets.
